Course

Research Techniques

BABS7180 | 6 Units of Credit

Overview

This course gives students an introduction to the core skills required to undertake a research project in the Biotechnology discipline. Students participate in tutorial and laboratory sessions to learn key skills such as equipment handling, analytical techniques in biotechnology and data handling. In addition, students develop their skills in the research of the scientific literature. This course is designed as a prelude to the subject BABS7190 - Biotechnology Research Project 2.
