Research Seminar
BENV7020 | 6 Units of Credit

Overview

This course is designed for BE postgraduate students, and prepares them to conduct research. It provides a basic understanding of designing a research project, with a focus on research design and an introduction to a range of research methods used in built environment disciplines. The course is taught in intense-block mode with concentrated periods of instruction.

There are accompanying tutorials for all students. For Higher Degree Research students (PhD, MRes, and MPhil), the tutorial sessions are conducted in the same semester, after the intensive lecture portion of the course is completed. For the professional degrees students, the tutorial is conducted as degree-specific breakout sessions in the following semester and has separate convenors for each degree's breakout stream.

Note: each tutorial will have separate course outlines where necessary.

DISCLAIMER
Please note that the University reserves the right to vary student fees in line with relevant legislation. This fee information is provided as a guide and more specific information about fees, including fee policy, can be found on the fee website.

For advice about fees for courses with a fee displayed as "Not Applicable", including some Work Experience and UNSW Canberra at ADFA courses, please contact the relevant Faculty. Fees for courses delivered through UNSW Global are published and charged by UNSW Global and thus appear as "Not Applicable" on this site.

Where a Commonwealth Supported Students fee is displayed, it does not guarantee such places are available.
