Overview

Engineering software systems for managing and analysing large datasets derived from genomics experiments is a key application of bioinformatics. This course revolves around a guided team project for the design and implementation of a complex system bringing together a variety of tools and methods for analysing genomic data. Methodologies for requirement gathering, system design, project management and documentation will be applied. The project work will be complemented by lectures on algorithms for biological sequence analysis that form the basis of the project work.

Conditions for Enrolment

Prerequisite: BINF9010 and COMP9021
Equivalent Courses

DESN2000 6 UOC
Engineering Design and Professional Practice

MMAN2100 6 UOC
Engineering Design 2

CVEN3031 6 UOC
Civil and Environmental Engineering Practice

SOLA2052 6 UOC
Project in Photovoltaics and Renewable Energy 2

COMP2111 6 UOC
System Modelling and Design

ELEC2142 6 UOC
Embedded Systems Design

Fees

Commonwealth Supported Students  $1191
Domestic Students  $4470
International Students  $5910

DISCLAIMER
Please note that the University reserves the right to vary student fees in line with relevant legislation. This fee information is provided as a guide and more specific information about fees, including fee policy, can be found on the fee website.

For advice about fees for courses with a fee displayed as "Not Applicable", including some Work Experience and UNSW Canberra at ADFA courses, please contact the relevant Faculty.

Where a Commonwealth Supported Students fee is displayed, it does not guarantee such places are available.
