Overview

*Note:* This course was previously offered as BIOS3071 but changed to BIOS6671 as of 2011.

The course covers applications of community ecology, population biology and genetics to the management of natural resources, environmental problems and conservation of biodiversity. Principles are conveyed using examples from terrestrial and marine flora and fauna, with a focus on the nature and importance of global diversity, and the design and management of programs for the conservation of species and ecosystems.

*Note 1:* Field excursions are compulsory and will involve additional expense to individual students.

**Fees**

Commonwealth Supported Students  $1191  
Domestic Students  $3900  
International Students  $5580  

**DISCLAIMER**

Please note that the University reserves the right to vary student fees in line with relevant legislation. This fee information is provided as a guide and more specific information about fees, including fee policy, can be found on the fee website.

For advice about fees for courses with a fee displayed as "Not Applicable", including some Work Experience and UNSW Canberra at ADFA courses, please contact the relevant Faculty. Fees for courses delivered through UNSW Global are published and charged by UNSW Global and thus appear as "Not Applicable" on this site.

Where a Commonwealth Supported Students fee is displayed, it does not guarantee such places are available.
