Course

Business Management for a Sustainable Environment

MBAX9103 | 6 Units of Credit

Overview

Business Management for a Sustainable Environment provides an overview of the range of environment issues facing our community, and the responsibilities of managers in addressing those issues. Via an understanding of the big picture, managers can make sound economic decisions compatible with a commitment to a sustainable environment. The more specific issues and control strategies discussed provide insights into environmental control techniques and methods for handling environmental problems, ranging from legal aspects to quantitative risk assessment.
