Overview

This course aims to provide students with theories and best practice models to support them in becoming a global scientist and an equitable leader. You will learn about globalisation and scientific contributions to sustainable global development and active global engagement. You will also learn about principles underpinning equity, diversity and inclusion in a local and global science context and apply them to foster an equitable and inclusive work environment through policies and organisational practice. Learning activities and assessments will be integrated through case studies and real-world scenarios which feature theories, strategies and reflections for equitable and inclusive leadership and practice.
