Industry-Led Capstone Professional Experience Project

SCIF7910 | 6 Units of Credit

Overview

This capstone professional experience project focuses on applied research and is linked with external agencies, industries and businesses who provide real-world projects to teams of students to work on. The projects will present a real-world problem and require you to collaborate in your team to solve it virtually, in an online learning environment. This course will enable you to integrate your leadership capabilities, professional skills and technical expertise into a meaningful experience that will consolidate and extend your learning in the program. External industry partners and UNSW Alumni will act as critical friends to provide you with feedback during your project. They will contribute expertise as part of your online learning community both synchronously and asynchronously.

Note: Students should enrol in this course over two consecutive terms for a total of 12UoC
