Overview

The Graduate Certificate of Commercial Biotechnology is an online coursework program consisting of four core courses. These courses provide students with the essential business and technical capabilities required by industry employees to capitalise on commercialisation opportunities within the biotechnology sector.

The program is aimed at mid-career, science-trained professionals working in the Australasian biotechnology industry or wider community of practice. This program is designed to expand and formalise students' skills and knowledge in regional and international biotechnology commercialisation, in order to improve innovation translation and enhance career advancement prospects.

The program is designed and delivered in consultation with industry and multi-disciplinary experts to ensure it is responsive to the current and emerging needs and trends in national and global job markets. The use of best-practice, industry relevant, online professional education provides students valuable networking opportunities for their current and future professional practice.

Learning Outcomes

1. Communicate and engage a range of specialist and non-specialist audiences for dissemination and advancement of information, ideas and opportunities

2. Demonstrate initiative, creativity and judgement in specialised professional practice

3. Take responsibility for own learning and continuing professional development to become innovative professional and life-long learner

4. Collaborate with colleagues as a team member and possibly a team coordinator

5. Demonstrate cultural, social, professional and ethical competence to be a responsible practitioner and a global citizen

6. Integrate and apply in-depth bodies of knowledge in science, regulation and enterprise to formulate effective strategies for commercialisation of products and processes in the global biotechnology industry

7. Analyse, evaluate, and synthesise knowledge for new developments of understanding relevant to the biotechnology field

8. Identify, provide, evaluate and reflect on innovative solutions and strategies to maximise market success, to meet organisational goals and objectives and to ensure compliance with legal, technical, ethical and regulatory frameworks

Graduate Capabilities:

For more information on Graduate Capabilities, please click on this link.
**Program Structure**

Students must complete 24 UOC as a standalone program.

**Core Courses**

Students must take 24 UOC of the following courses.

- **BABS7010 | 6 UOC**  
  Introduction to Biotechnology Commercialisation

- **BABS7020 | 6 UOC**  
  Biotechnology Commercialisation Strategy in Australia and Asia

- **BABS7030 | 6 UOC**  
  Foundations in Biotechnology Finance

- **BABS7040 | 6 UOC**  
  Negotiating Biotechnology in Asian Markets

**Enrolment Disclaimer**

Unless advised otherwise by your program authority, you should follow the rules for the handbook for the year you commenced your program. You are also responsible for ensuring you enrol in courses according to your program requirements. myUNSW enrolment checks that you have met enrolment requirements such as pre-requisites for individual courses but not that a course will count towards your program requirements.
Admission Requirements

Entry Requirements

Prospective students will need a Bachelor's degree in a bioscience related field.

For more information about admission requirements for various UNSW programs, visit the following website(s):

Domestic Students
International Student
Program Requirements

Progression Requirements

Students must pass all four courses for the award.

For more information on university policy on progression requirements please visit Academic Progression.
Program Fees

At UNSW fees are generally charged at course level and therefore dependent upon individual enrolment and other factors such as student's residency status. For generic information on fees and additional expenses of UNSW programs, click on one of the following:
