Overview

Planning is an exciting, varied and progressive profession which plays a pivotal role in decisions shaping the future of cities and regions. Planners need to see the whole picture: we need to be good thinkers, good analysts and good communicators. We work with stakeholders across the spectrum of interests - from global developers to local communities - to foster feasible, equitable and sustainable outcomes. Sydney and NSW provide a fantastic laboratory to help understand the crucial role played by planners in addressing complex challenges, systematically placed in its global context through critical analysis and drawing upon best practice. The Graduate Certificate in City Planning [GCCP] degree is designed for students with an undergraduate qualification in a related discipline seeking to move into a planning or planning-related field. It is also tailored for professionals working in other sectors, especially those whose work may intersect with the planning system or requires involvement with planning agencies. Subject to progress, students can articulate from the GCCP into the Graduate Diploma or Master of City Planning.

The Grad Cert in City Planning aims to produce high quality graduates who have acquired UNSW Graduate attributes and are capable, through their skills, knowledge and experience, of undertaking a wide range of tasks required of a qualified planning practitioner. As well as preparing for the profession, a planning degree provides lifelong analytical, collaborate and communication skills much in demand more widely.

Professional Outcomes

Career Opportunities

The Grad Cert in City Planning [GCCP] degree provides an excellent platform to take up planning and urban policy-related opportunities across all tiers of government (Federal, State, local), private sector consultancies, property development, and indeed the breadth of built environment professions where planning skills are required. The interdisciplinary skill sets developed through the diploma also enable graduates move into wider policy, research, analytical, creative and community roles both in Australia and overseas.
Program Fees

At UNSW fees are generally charged at course level and therefore dependent upon individual enrolment and other factors such as student's residency status. For generic information on fees and additional expenses of UNSW programs, click on one of the following:
