Overview

The Master of Architecture program provides professional education in the practice and theory of architecture. It is a two year full time program. It is designed to deliver an architectural education appropriate to contemporary multidisciplinary professional practice. The Master of Architecture encourages students to extend and use fundamental skills developed in their undergraduate studies to explore broader socio-cultural and specific technical challenges, including in an area of specialisation.

The Urban Conditions Stream is one such specialised stream focusing on the design of buildings and precincts in the context of the contemporary city and its challenges including the relationship of buildings to the public domain, urban infrastructure and environmental sustainability.
**Faculty**  
Faculty of Built Environment

**School**  
School of Built Environment

**Study Level**  
Postgraduate
