Labour Economics

ECON7303 | 6 Units of Credit

Overview

The course teaches core topics in the field of labour economics as well as introduces empirical methods for applied microeconomic analysis. The aim of this course is to encourage development of independent research interests in labour economics and related fields. Topics include wage and employment determination, formation of human capital, labour market discrimination, immigration, unemployment, wage differentials, wage structure, and institutions in the labour market. There will be particular emphasis on the interaction between theoretical and empirical modelling.
