In order to satisfy the EA expectations of a graduating engineer, students need to have exposure to professional practice. At UNSW, this means at least the equivalent of 60 days of relevant Industrial Training. Students get first-hand experience in an engineering-practice environment.

This course is for students to submit their Final Industrial Training report. Completion of the Industrial training pre-requisite modules must be completed prior to seeking pre-approval for a placement. Once approval has been given and students have completed their 60 days of Industrial Training, students are required to submit the Final Industrial Training report via the ENGG4999 Moodle site. The Faculty Industrial Training Administration team will enrol the student into ENGG4999.
