Learning and Physiological Psychology
PSYC2081  |  6 Units of Credit

Overview

This course focuses on the behavioural and physiological basis of elementary learning processes. These include: learning about relations between events (Pavlovian conditioning), learning about relations between one’s behaviour and events (Instrumental conditioning), how these forms of learning control behaviours and their involvement in addiction, attachment and schizophrenia. The course emphasises psychological explanations of behaviour but also seeks to ground these processes in neurobiology.
