Computational Biology Engineering Design Workshop

BINF6112 | 6 Units of Credit

Overview

Through a practical software project and targeted lectures this course examines various issues in the design and implementation of software systems for the analysis of large complex biological datasets and the application of mathematical and statistical methods to problems in modern life science. Example domains include analysis of gene expression and function, networks of interaction, and systems modeling.

Fees

Commonwealth Supported Students  $1191
Domestic Students  $5970
International Students  $5970

DISCLAIMER
Please note that the University reserves the right to vary student fees in line with relevant legislation. This fee information is provided as a guide and more specific information about fees, including fee policy, can be found on the fee website.

For advice about fees for courses with a fee displayed as "Not Applicable", including some Work Experience and UNSW Canberra at ADFA courses, please contact the relevant Faculty.

Where a Commonwealth Supported Students fee is displayed, it does not guarantee such places are available.
