Overview

This is a foundational (Level 1) Business Analytics course that will introduce students to basic concepts, techniques, and technologies relevant for creating and managing business databases. Students will learn the basics of the Structured Query Language (SQL) language and how to use it to access data stored in relational database system, including fetch, delete, insert, and modify data. In addition, students will also learn fundamental programming concepts including data structures, networked application program interfaces, using the Python programming language.
