Handbook

Course

Object-Oriented Design & Programming

COMP2511 | 6 Units of Credit

Overview

This course aims to introduce students to the principles of object-oriented design and to fundamental techniques in object-oriented programming. It is typically taken in the second year of study, after COMP2521, to ensure an appropriate background in data structures. The knowledge gained in COMP2511 is useful in a wide range of later-year CS courses.

The goal of the course is to expose students to:

- the fundamental principles of object-oriented design
- object-oriented programming and object-oriented design in Java
- the application of sound programming and design skills
- problem solving and modeling of real world problems from science, engineering, and economics using the object-oriented paradigm

Conditions for Enrolment

Prerequisite: COMP1531 AND (COMP2521 OR COMP1927)
Exclusion Courses

COMP2911 | 6 UOC
Engineering Design in Computing

COMP2011 | 6 UOC
Data Organisation

**DISCLAIMER**

Please note that the University reserves the right to vary student fees in line with relevant legislation. This fee information is provided as a guide and more specific information about fees, including fee policy, can be found on the [fee website](#).

For advice about fees for courses with a fee displayed as "Not Applicable", including some Work Experience and UNSW Canberra at ADFA courses, please contact the relevant Faculty.

Where a Commonwealth Supported Students fee is displayed, it does not guarantee such places are available.
Additional Information

This course is offered as General Education.
