Overview

SCIF1131 provides the opportunity for students to become aware of and develop their professional capabilities. As few great ideas are created in isolation, the connection between like-minded individuals, as well as building on past and present ideas, are the foundation for innovation. Development of these ideas requires collaboration (fitting different pieces together and critical appraisal) and communication for wider awareness. In this course, students will practise teamwork and communication, both as generic skills and within a scientific discipline.
