The Bachelor of Commerce (BCom) is a highly valued business qualification that can open the door to a wide variety of career options for graduates. The degree is also flexible enough to allow students to design a degree which aligns with their interests and career ambitions in accounting, finance, human resource management, marketing, information systems or Taxation.

Students also have the option to design their BCom degree with a broader business focus through management, international business, business economics or business law specialisations. For detailed information on the professional recognition this degree offers please visit Professional Recognition of Programs in the UNSW Online Handbook.

It is assumed that students have a certain level of knowledge in advanced mathematics in order to cope well with the mathematical or statistical component of a business degree. If you are successful in obtaining a place without this assumed knowledge, you are strongly encouraged to consider studying a Mathematics Bridging Course before starting your degree.

Program benefits:

- Highly regarded by industry
- Provides students with the fundamentals of business and the option to explore their interests
- Prepares students academically, technically and professionally
- Equips students with the skills and knowledge to pursue a variety of career options
- Allows students to obtain accreditation in a range of areas
