Specialisation

Photovoltaics and Solar Energy

SOLAAH

The stream includes training in technology development, manufacturing, quality control, reliability and life-cycle analysis, cell interconnection and encapsulation, a range of solar cell applications, system design, maintenance and fault diagnosis, marketing, policy development and the use of other renewable energy technologies. Emphasis is placed on gaining hands-on experience of working with solar energy devices, modules and systems.

Innovative teaching techniques have been developed to enhance the learning environment including the 'Virtual Production Line' and 'Virtual World Solar Car Challenge'. UNSW academics in the photovoltaic field have been consistently ranked amongst the leaders worldwide through international peer review. This team has held the world record for silicon solar cell efficiencies for decades and were responsible for developing the most successfully commercialized new photovoltaic technology internationally throughout the same period. From 2006 onwards we have seen an explosion of interest in the School's technologies from major industry players all around the world.

Second Area of Specialisation

The cross-disciplinary nature of photovoltaics and renewable energy applications necessitates many PV engineers possessing broad engineering backgrounds or else working in teams with other engineers. A good example is the UNSW Solar Car Project involving PV engineers, electronics engineers, control engineers, mechanical engineers, chemical engineers, power engineers, biomedical engineers, computer engineers, and communication engineers. Therefore it is important for photovoltaic engineers to have a broader understanding of other engineering disciplines.

A unique feature of this stream is that in Year 2, students have the opportunity to select a strand to complement their education in Photovoltaics and Solar Energy. Each strand comprises 18 units of credit with the opportunity to subsequently select additional electives in the corresponding area in the final two years, subject to the
approval of the Undergraduate Coordinator. The strands available are listed below and cover areas such as computing, electronics, mathematics, mechanical engineering, civil engineering, physics, chemical engineering, and architecture. Students may also formulate their own strands subject to the approval of the Undergraduate Coordinator.

Selection of a second area of specialisation is subject to the stream rule that states that no more than 60 UOC of first-year level courses may be counted toward the BE (Hons) in Photovoltaics and Solar Energy.

Photovoltaics and Solar Energy is also available as a component of the dual degree programs.
Faculty
Faculty of Engineering

School
School of Photovoltaic and Renewable Engineering

Study Level
Undergraduate

Minimum Units of Credit
168

Specialisation Type
Honours
Available in Program(s)

Program(s) in which this honours is available

Bachelor of Engineering (Honours) - BE (Hons)
3707 Engineering (Honours)
Faculty: Faculty of Engineering
Campus: Kensington
Units of Credit: 192
Typical Duration: 4 Years
Specialisation Structure

Students must complete 168 UOC.

Level 1 Core Courses

Students must complete 42 UOC.
Note: Students doing a Computing Strand should take COMP1911.

**ENGG1000** 6 UOC  
Introduction to Engineering Design and Innovation

**MATS1101** 6 UOC  
Engineering Materials and Chemistry

One of the following:

**MATH1131** 6 UOC  
Mathematics 1A

**MATH1141** 6 UOC  
Higher Mathematics 1A

One of the following:

**MATH1231** 6 UOC  
Mathematics 1B

**MATH1241** 6 UOC  
Higher Mathematics 1B

One of the following:

**PHYS1121** 6 UOC  
Physics 1A

**PHYS1131** 6 UOC  
Higher Physics 1A

One of the following:

**PHYS1221** 6 UOC  
Physics 1B
Higher Physics 1B

One of the following:

Computing 1A

Computing for Engineers

Level 2 Core Courses

Students must take 36 UOC of the following courses.

Note: Students selecting Mathematics Strand and Physics Strand, and BE/BSc students majoring in 'Mathematics' or 'Physics' should replace MATH2019 with MATH2011 Several Variable Calculus and MATH2121 Theory and Applications of Differential Equations.

Numerical Methods and Statistics

Project in Photovoltaics and Renewable Energy 1

Project in Photovoltaics and Renewable Energy 2

Introduction to Electronic Devices

Applied Photovoltaics

One of the following:

Engineering Mathematics 2D

Engineering Mathematics 2D
**Level 3 Core Courses**

Students must take 18 UOC of the following courses.

- SOLA3010 | 6 UOC
  Low Energy Buildings and Photovoltaics

- SOLA3020 | 6 UOC
  Photovoltaic Technology and Manufacturing

- SOLA3507 | 6 UOC
  Solar Cells

**Level 4 Core Courses**

Students must take 30 UOC of the following courses.

- ELEC4122 | 6 UOC
  Strategic Leadership and Ethics

- SOLA4012 | 6 UOC
  Photovoltaic Systems Design

- SOLA4951 | 4 UOC
  Research Thesis A

- SOLA4952 | 4 UOC
  Research Thesis B

- SOLA4953 | 4 UOC
  Research Thesis C

- SOLA5057 | 6 UOC
  Energy Efficiency
**Discipline Elective**

Students must take 12 UOC of the following courses.  
Note: Approval of the Undergraduate Coordinator is required for selection of courses from outside the school.

- any level 3 course offered by Faculty of Engineering
- any level 4 course offered by Faculty of Engineering
- any level 3 Photovoltaics and Solar Energy course
- any level 4 Photovoltaics and Solar Energy course

**Level 1 Prescribed Electives**

Students must take at least 12 UOC of the following courses.

CHEM1031 and CHEM1041 will only be available to students enrolled in a program which has a Chemistry major.

- **BABS1201**  |  6 UOC  
  Molecules, Cells and Genes

- **BIOM1010**  |  6 UOC  
  Engineering in Medicine and Biology

- **BIOS1301**  |  6 UOC  
  Ecology, Sustainability and Environmental Science

- **CEIC1000**  |  6 UOC  
  Sustainable Product Engineering and Design

- **CHEM1011**  |  6 UOC  
  Chemistry 1A: Atoms, Molecules and Energy

- **CHEM1021**  |  6 UOC  
  Chemistry 1B: Elements, Compounds and Life
CHEM1031   | 6 UOC  
Higher Chemistry 1A: Atoms, Molecules and Energy

CHEM1041   | 6 UOC  
Higher Chemistry 1B: Elements, Compounds and Life

CHEM1811   | 6 UOC  
Engineering Chemistry 1A

CHEM1821   | 6 UOC  
Engineering Chemistry 1B

COMP1521   | 6 UOC  
Computer Systems Fundamentals

COMP1531   | 6 UOC  
Software Engineering Fundamentals

CVEN1701   | 6 UOC  
Environmental Principles and Systems

ELEC1111   | 6 UOC  
Electrical and Telecommunications Engineering

ENGG1100   | 6 UOC  
Grand Challenges for Engineering

ENGG1200   | 6 UOC  
Undergraduate Special Projects

ENGG1300   | 6 UOC  
Engineering Mechanics

ENGG1400   | 6 UOC  
Engineering Infrastructure Systems

**Strand Electives**

Students may choose up to 18 UOC of elective courses in a particular area of focus (Strand) such as Computing, Electronics, Electric Energy, Communications and Control, Mathematics, Mechanical Engineering, Chemical Engineering, Physics, Faculty of Built Environment or may also formulate their own Strands subject to the approval of the Undergraduate Coordinator.

Note:
- The Strand options listed are subject to change and may not be available every year.
- Strand options are for students commencing the second year of their program; third year students should complete the strand courses they have already

Enrolment Disclaimer

You are responsible for ensuring you enrol in courses according to your program requirements. myUNSW enrolment checks that you have met enrolment requirements such as pre-requisites for individual courses but not that a course will count towards your program requirements. Do not assume that because you have enrolled in a course that the course will be credited towards your program.
Additional Information

Professional Recognition

The BE (Hons) in Photovoltaics and Solar Energy is fully accredited by Engineers Australia.
