Overview

The Information Systems (IS) minor is tailored to students who are interested in business and management aspects of the discipline. You will learn about business IS in various complex decision making contexts and how these systems, and the information generated by them, support the modern organisation in achieving both day-to-day and long-term objectives. Graduates from this specialisation have a range of broad career paths to choose including: Business Analyst Consulting; Forensics and intelligence; New Product/Service Development; Internet Entrepreneurship; Systems Development; Communications and networking; Information Systems Security; Project Management; and Information Technology Management.
