

Course

Advanced Data Analysis and Methods of Psychological Inquiry

PSYC5004 | 6 Units of Credit

Overview

This course is designed to extend the existing knowledge concerning experimental research designs in behavioural sciences and the statistical techniques that deal with them. It provides intermediate knowledge of conceptual, methodological and statistical skills that are likely to be encountered in the future research and professional work. Students will be taught to perform descriptive and inferential statistical analyses using a computer-based statistical package. In addition, this course enables students to effectively communicate statistical and research data results in variety of formats and contexts.
