Overview

This course introduces students to the basics of programming. The objective of the course is for students to develop proficiency in program design and construction using a high-level programming language. Topics covered include: fundamental programming concepts, the C programming language, programming style, program design and organisation, program testing and debugging. Practical experience of these topics is supplied through laboratory exercises and programming assignments.

Additional Information:

This course is designed for non-computing majors who want a solid introduction to programming, with the aim of using computers as part of some other discipline. It does not assume any prior background in programming.

Electrical Engineering, Telecommunications, Mechanical Engineering, and Mechatronic Engineering specify this as the standard first year computing course. COMP1911 and the following course COMP1521 provide a solid introduction to programming and computer systems concepts for all of these students.

Students with an interest in computing or who wish to be extended might want to consider COMP1511 as an alternative, especially if they plan to study more computing as part of their future study. Students from all degrees are permitted to take COMP1511 instead of COMP1911.

Note: Because of significant content overlap, students cannot take both COMP1911 and COMP1511.

COMP1911 Course Outline
Fees

Commonwealth Supported Students $1191
Domestic Students $5970
International Students $5970

DISCLAIMER
Please note that the University reserves the right to vary student fees in line with relevant legislation. This fee information is provided as a guide and more specific information about fees, including fee policy, can be found on the fee website.

For advice about fees for courses with a fee displayed as "Not Applicable", including some Work Experience and UNSW Canberra at ADFA courses, please contact the relevant Faculty.

Where a Commonwealth Supported Students fee is displayed, it does not guarantee such places are available.
Additional Information

This course is offered as General Education.
