Management and Ethics

Overview

This course will develop a framework on which management and ethical issues can be developed, and also develop skills in software project management.

Topics covered will include management issues such as:

- management of innovation
- engineering project planning and control
- human factors
- patents
- technical strategy

In addition, the following ethics topics will be covered:

- introduction to ethics
- workable ethical theories
- morality of breaking the law
- privacy
- public information and records
- and related topics

Students carry out a significant software development project in teams.
